## The online language learning environment that language educators have been waiting for!  And it's so easy to use!

**SANSSpace is a dynamic, 24/7, online interactive language learning environment** designed specifically for Language Educators to manage and deliver YOUR course content to students, track and measure progress and enable collaboration.  Students learn how to speak, read, write, and listen in their new language by completing YOUR courses anytime, anywhere.

The system features a **powerful, online comparative recorder and player**.  Students can interrogate and record their own answers and responses to video and audio files.  Instructors can provide feedback, mark and assess the work through a powerful bookmarking feature, either by video, audio or text.

**Live collaboration** is supported by a streamed multi person chat feature in text, audio and video for 'real time' tuition in a controlled setting.

SANSSpace can be used for **Online Learning, Classroom Learning, Blended Learning, Distance Education and more**.
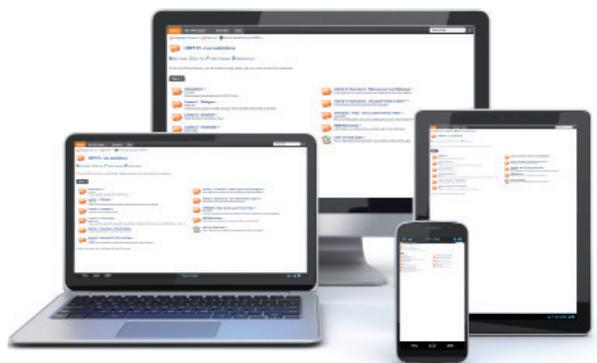

**Audio, video, image and text exercises** can be very easily added by the instructor/faculty/organisation and be used to deliver powerful curriculum aligned courses including activities, lessons, quizzes and more.  Through carefully constructing a series of activities and lessons YOUR way, students can very quickly start learning and communicating in the target language.

SANSSpace can be used **24/7 anytime, anywhere, from any device** with access to the internet including computers, laptops, tablets and  smart phones.  SANSSpace **Apps are also available for iPhone®, iPad® and Android™  devices**.

Accessible from any browser, SANSSpace compliments the **Bring Your Own Technology (BYOT) or Bring Your Own Device (BYOD)** strategies in education.  The system compliments existing learning management systems that may be in place at your institution.

**Powerful administration features** enable administrators to very easily manage the system.

**Tracking and reporting tools** provide a complete picture of student interaction with multimedia materials.  Instructors can quickly identify areas where students require attention as well as being able to stretch the more able.  The tracking and quiz features can also be used for student grading.  Reports provide great visibility to managers on the return on their language learning investment.

*"For me, SANSSpace represents an important milestone in the development of effective teaching methods for language learning."*
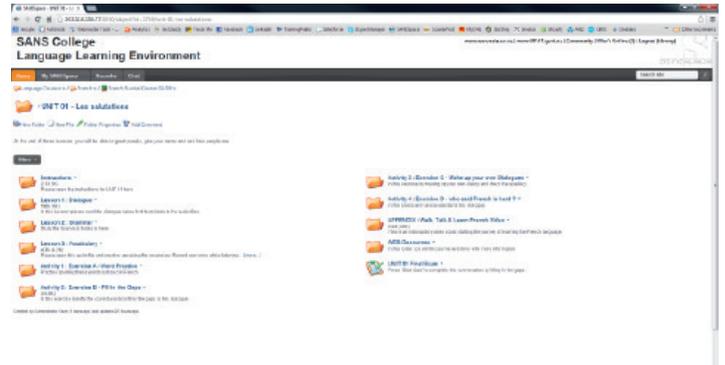

– Will Harvey, Didcot Girls School

# How does it work?

**SANSSpace is a powerful, easy to use, online language learning system that is used by Language Educators to manage and deliver language courses and content to their students, track and measure their progress and enable collaboration.**

### YOUR Learning Community

Firstly SANSSpace can be customised to reflect your organisation's branding and fit within your organisation's existing intranet, website or "cloud".

Your typical learning community is likely to include students, Instructors and an administrator. Within SANSSpace it is possible to define permissions based on the type of user. For example an appointed Administrator may have full administrative rights, whilst a student may only be given access to courses that they are studying. Instructors can very easily either post or even create their own courses and learning resources or content from designated publishers in dedicated SANSSpace folders or other folders on the School/Faculty/Organisation's network.

### Course Management and Delivery

Text, audio and video resources for lessons, quizzes or reference can be added or created easily and quickly. Free content from the internet or from relevant publishers can also be uploaded. Educators can add course instructions, announcements, deadlines and content related information for any task. Course content can be reused time after time, archived or made available automatically at a preset date. **YOU can add new and modify existing courses and content whenever and wherever you want - very quickly and very easily!**

### The Digital Comparative Recorder is a powerful tool for Language Educators and Students

Designed specifically for Language Educators, this powerful recorder allows Students and Instructors to work with both audio and video files both individually and collaboratively.

Users are able to listen to an audio file while simultaneously recording their voice. This is great for language drills as encountered in traditional language laboratories.

The MarkIT™ "bookmarking" feature allows both students and Instructors to insert written or verbal comments at specific points in an audio or video file. Feedback, marking and collaboration is made very easy and effective.

Students can save recordings to their personal folder or "submit' their work to the course folder which allows the Instructor to open and mark it. Students also have the option of sharing their recordings with other sudents for collaborative exercises.

This online recorder is also available as an application for compatiable Apple® or Android™ devices. SANSSpace can be opened in a standard browser and when the Digital Comparative Recorder is accessed, the app will seamlessly open.

### Track and Mark

SANSSpace captures all user activity so that educators and students can easily view the learning process. The fluidity with which students are progressing through course content can be monitored and any areas of difficulty can be identified and targeted. Instructors can communicate comments and grades back to students collectively or individually.

### Granular Reporting

The powerful granular tracking functionality is a strategic tool for Administrators and Instructors. With a complete picture of the learning community's utilisation of resources through SANSSpace, it's easy to see activity within a given period of time, assess teaching and learning outcomes and adjust use accordingly. Instructors can also quickly identify students who are struggling and extend those more able. Reports can be customised to a high degree of detail if required and exported in standard file formats.

### Collaborate and Stay Connected

Students and Instructors can stay connected with each other through a variety of communication tools including live chat, forums and an announcement function.

### Folders / Student Portfolios

The easy-to-use Content Management System (CMS) allows Instructors and Students to access their folders and files relevant to the courses they are enrolled in. Student work files (including video, audio and text) can be saved in their own portfolios or shared for collaborative exercises.

If your organistaion already has an CMS where Students and Instructors have their own accounts and storage, SANSpace can be configured to link to these.

## Does SANSSpace support Classroom, Virtual and Blended learning?

Absolutely! With SANSSpace, students and instructors can collaborate in a very flexible, yet controlled online environment anytime and anywhere. They may be in a fixed physical location with time specific learning; they may be virtual without set spaces or times; or they may be blended, combining both fixed and virtual learning spaces. Varied learning environments provide schools with opportunities to address the needs of student populations that may be full or part-time and on or off campus – often with schedules that make it difficult to facilitate only traditional classroom based language learning. SANSSpace extends language learning opportunities to meet these needs and the expectations of today's students. It is also the perfect online tool for any Distance Language Education Program.

## Who developed SANSSpace?

SANSSpace was developed by SANS Inc. in the USA, the company who developed the worlds most advanced Digital Language Lab Software, Sony Virtuoso™ and Sony Soloist®.

## What languages does it offer?

SANSSpace is not "language specific", meaning that it can be used as an instructional tool for all spoken and visual languages. If you teach 10 foreign languages, you can use it for 10 languages. If you teach only ESL, you can use it for only ESL. You can even teach sign language! SANSSpace is a system designed for YOU to deliver YOUR language courses.

## Is SANSSpace just another Vocabulary System?

SANSSpace is **NOT** just a system that can deliver vocabulary lessons. It is a powerful online, content management and language learning tool that enables you to very easily deliver and manage all of your language courses, lessons and exercises (whether it's vocabulary, grammar, conversational exercises or culture, SANSSpace has you covered). When it comes to vocabluary, you can load as many vocabluary exercises as you wish in any format and in any language - there's no limit.

## How much does it cost?

We understand that language resources can be limited. SANSSpace is **NOT** charged by the number of Language Courses you teach. SANSSpace can be used to teach any number of language courses and other subjects.

**SANSSpace is charged per user license**. For example, you may have 500 Students learning a language and 10 Instructors and 1 Administrator. Therefore you would require 511 SANSSpace licenses.

The overall cost of SANSSpace depends on how many licenses you require and the license period you would like to sign up for (we offer 1, 2 or 3 year options). **Please contact us to discuss pricing for your organisation.**

A popular consideration is potentially charging students a "Software Fee", meaning that the software can be either part-funded or fully funded by your students and not by your organisation or grant.

## Can I get a free trial of SANSSpace?

Absolutely! If you are interested in recieving a free trial, **contact us today at sales@sansoceania.com**

However, first we'll conduct a personalised one-on-one demo where you can see SANSSpace in action. This also provides you a great opportunity to ask us questions relating to how SANSSpace would benefit your organisation and your students. Then we'll provide you with a small number of licenses for your own free trial.
